Create and Populate
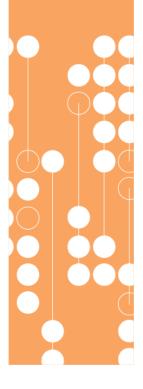

Exercise Handout

Exercise – Create and Populate

In this exercise, you will practice creating and populating a database table.

Tasks

Create a table to store the readers in a library. For each reader:

1. Ensure they are uniquely identified
2. Store name, age, city and passport number
3. Assume default for city to be London
4. Readers must be 18 years or older
5. Passport numbers should be unique
6. Add records for some readers to the table

QA

Learn. To Change.
